

MIKHAIL KURNOSOV

Professor, Computer Systems Department,
Siberian State University of Telecommunications and Information Sciences,

Address: 630102, 86 Kirova str., Novosibirsk, Russia

Email: mkurnosov@gmail.com **Skype:** mikhail.kurnosov **Web:** <http://www.mkurnosov.net>

EDUCATION

- 2016 **Doctor of Science**, Siberian State University of Telecommunications and Information Sciences, Novosibirsk, Russia
- 2005 – 2008 **Candidate of Science (PhD)**, Siberian State University of Telecommunications and Information Sciences, Novosibirsk, Russia
- 2000 – 2005 **Diploma in Mathematics**, Gorno-Altaysk State University, Gorno-Altaysk, Russia

POSITIONS AND EXPERIENCE

Siberian State University of Telecommunications and Information Sciences,
Computer Systems Department, Novosibirsk

2016 – present Professor
2008 – 2016 Associate Professor
2007 – 2008 Senior Lecturer
2005 – 2007 Assistant (PhD student)

- Models and algorithms for optimizing parallel programs (MPI, OpenMP)
 - Benchmarking MPI collectives: MPIPerf (<https://github.com/mkurnosov/mpiperf>)
 - Optimizing MPI process placement: TopoMPI (<http://topompi.cpct.sibsutis.ru>)
 - Optimized MPI Collectives (<https://github.com/mkurnosov/reduce-kchain>)
 - Implementing MPI collectives in Open MPI (<https://www.open-mpi.org>)
- Designing and administration of HPC clusters (NIS/NFS, SLURM, TORQUE, InfiniBand)
- Teaching courses (<http://www.mkurnosov.net/teaching>, <https://www.slideshare.net/mkurnosov>)
 - Parallel Programming (undergrad. and M.Sc. students)
 - Theory of Distributed Computer Systems Functioning Organization (undergrad. stud.)
 - High-Performance Computing Systems (undergrad. and M.Sc. students)
 - Data Structures and Algorithms (undergrad. students)
- Advising: Bachelors, Masters and PhD students (3 Candidate of Science – 2013, 2018, 2019)

Rzhanov Institute of Semiconductor Physics Siberian Branch of Russian Academy of Sciences,
Computer Systems Laboratory, Novosibirsk, Russia

2017 – present Senior Research Scientist
2012 – 2016 Research Scientist
2007 – 2012 Research Assistant
2006 – 2007 Software Engineer

- Design and optimization of parallel programs: MPI, OpenMP, CUDA, SIMD-vectorization
- Teaching course “Introduction to Parallel Programming” (2015-2016) <http://www.mkurnosov.net/parprog>

Yandex, School of Data Analysis, Novosibirsk, Russia

2014 – 2016 Lecturer
Course “Parallel and Distributed Computing” (C++11 multithreading, OpenMP, MPI, MapReduce, Apache Hadoop, distributed algorithms)

Intel, Threading Tools (SSG), Nizhny Novgorod, Russia

Summer 2006 Software Engineer (Intern)
Porting GNU/Linux version of Intel Thread Profiler runtime library to the Pin – dynamic binary instrumentation tool (C/C++, Pin probes, POSIX threads)

Republican Center of Children's Creativity, Gorno-Altaysk, Russia

1998 – 2005 Software Engineer

- Software Development
 - Development of educational programming language Rapira++: modifiable syntax – Russian and Altay keywords, basic OOP constructions, visual programming, IDE (<https://github.com/mkurnosov/rapiraxx>, <http://www.school-sector.relarn.ru/dckt/projects/rapira/>)
 - Client-server software for monitoring and remote control of launched application on Windows-based workstations (C, DLL injection, Win32 API, network sockets, MySQL)
- Teaching courses (high school students): Rapira++, Visual Basic, Delphi, JavaScript; network technologies (TCP/IP, Ethernet switches: VLANs, Spanning Tree, QoS; WiFi protocols)

RESEARCH INTERESTS

- I. Parallel programming models and runtime systems (MPI, global address space, task parallel models)
 - MPI, PGAS: algorithms for collective communications, task mapping, performance analysis
 - Performance optimization: MPI, OpenMP, CUDA, SIMD-vectorization, MapReduce
- II. Distributed computing: decentralized algorithms for job scheduling

AWARDS

- 2019 Certificate of Honor of the Governor of the Novosibirsk Region
- 2017 Diploma of city administration of Novosibirsk
- 2012 Award of the Government of the Russian Federation in the field of education
- 2009 Award of Administration of Novosibirsk Region
- 2008 Intel Scholarship in Recognition of Academic Progress and Active Scientific Work
- 2007 Alcatel-Lucent Scholarship
- 2007 Scholarship of the Government of the Russian Federation
- 2004 Scholarship of the Russian Federation President

ATTENDED SCHOOLS AND WORKSHOPS

- 2009 Architecture of High-Performance Computer Clusters, Institute for System Programming of RAS, Moscow, Russia
- 2007 Intel Multicore Programming for Academia, Intel, Nizhny Novgorod, Russia
- 2007 Java Programming, Sun Java Academy, Sun Microsystems, Novosibirsk, Russia
- 2006 Russian-German Schools on Parallel Programming and High-Performance Computing Systems, -2008 Institute of Computational Technologies SB RAS, Novosibirsk, Russia

SELECTED PUBLICATIONS (MOSTLY IN RUSSIAN)

Book Chapters

1. V.G. Khoroshevsky, M.G. Kurnosov et al. Computational Methods, Algorithms and Hardware and Software Tools for Parallel Modelling of Natural Processes. Chapter 2 on Architecture and Software of Distributed Computer Systems, SB RAS, 2012. – 355 p. (in Russian, ISBN 978-5-7692-1237-6).
2. Kurnosov M. Introduction to Data Structures and Algorithms. – Novosibirsk, 2015. – 179 p. (in Russian, ISBN 978-5-9906983-4-5, <http://dsabook.mkurnosov.net/>)
3. Kurnosov M., Paznikov A. Theory of Distributed Computer Systems Functioning Organization. – Novosibirsk, 2015. – 52 p. (in Russian, ISBN 978-5-9906983-5-2).

Dissertation (thesis)

1. Kurnosov M. Algorithms for Functioning Organization of Hierarchical Distributed Computer Systems (Doctor of Science), Siberian State University of Telecommunications and Information Sciences, Novosibirsk, Russia, October 2016.
2. Kurnosov M. Models and Algorithms of Mapping Parallel Programs into Distributed Computer Systems, Ph.D. Dissertation (Candidate of Science), Siberian State University of Telecommunications and Information Sciences, Novosibirsk, Russia, December 2008 (Advisor: Corresponding Member of RAS Prof. V.G. Khoroshevsky).

Refereed Journal Articles

1. Kurnosov M. *Analysis and Optimization of Pipelined Broadcast Algorithms* // Journal “Vestnik SibGUTI”, 2019, No. 2, pp. 43-56 (in Russian).
2. Peryshkova E., Kurnosov M. *Modeling Network Contention Effects on Process Allocation in Computer Systems* // Journal “Vestnik Tomskogo gosudarstvennogo universiteta. Upravlenie vychislitel'naya tehnika i informatika” (Tomsk State University Journal of Control and Computer Science), 2019, No. 47, pp. 93-101 (in Russian).
3. Kurnosov M. *Analysis and Optimization of a k-chain Reduction Algorithm for Distributed Computer Systems* // Journal “Numerical Methods and Programming”, 2017. – Vol. 17. – pp. 318-328 (in Russian).
4. Kulagin I., Kurnosov M. *Instrumentation and Optimization of Transactional Sections Execution in multi-threaded Programs* // Proceedings of the Institute for System Programming. – 2015. – Vol. 27 (6). – pp. 135-150 (in Russian).
5. Kulagin I., Paznikov A. Kurnosov M. *Heuristic Algorithms for Optimizing Communications in Parallel PGAS-programs* // Journal “Vestnik SibGUTI”, 2014, No. 3, pp. 52-66 (in Russian).
6. Pavsky K., Kurnosov M., Polyakov A. *Software Tools for Optimizing Parallel Modeling of Nanostructures with Quantum Dots*. Journal “Avtometriya”, 2014, Vol. 50(3), pp. 56-61 (in Russian).
7. Kurnosov M., Paznikov A. *Heuristic Algorithms for Mapping Parallel MPI Programs into Multicluster Computer and Grid Systems*. Journal “Vichislitel'nie metodi I programmirovaniye”, 2013, Vol. 14(2), pp. 1-10 (in Russian).
8. Kurnosov M. *MPIPerf: a Toolkit for Benchmarking MPI-libraries*. Journal “Vestnik NNGU”, 2012, No. 5(2), pp. 385-391 (in Russian).

RESEARCH GRANTS (PRINCIPLE INVESTIGATOR)

1. Models and methods of analyzing and organizing of multiprogram execution of parallel programs on large-scale computer systems, Russian Foundation for Basic Research, 2018-2020
2. Models, algorithms and software for optimizing PGAS-programs, Russian Foundation for Basic Research, 2015-2017
3. Algorithms and system software for optimizing functioning of hierarchical computer systems, Russian Foundation for Basic Research, 2015-2016
4. Models, Methods and Software for Efficient Execution of Parallel Programs on Multiarchitectural Computer Systems, Russian Foundation for Basic Research, 2011-2013
5. Topology-aware Algorithms and Software for Functioning Organization of Distributed Computer Systems, Russian Foundation for Basic Research, 2008-2010
6. Development of Tools for Mapping Parallel MPI Programs into Multicore Computer Clusters, Foundation for Assistance to Small Innovative Enterprises, 2008-2009
7. Grant of Novosibirsk’s Administration, 2009
